ABSTRACT

The first of a two-part study of the comprehensive 1962 public library survey, this report presents institutional data for public libraries serving 35,000 persons and above. In content and coverage it continues the 1960 public library survey which was released in three parts in 1961 and 1962 under the title, "Statistics of Public Library Systems, Fiscal Year 1960." This series of data has been presented annually since 1944 and biennially since 1960. The 1962 survey was designed to permit trend comparisons with the 1955-56 and 1960 surveys. Information on the amount and sources of income was collected for the first time. The purpose and design of the 1962 survey was extended in order to permit the construction of the first national public library sample. Four tables provide summary data and statistics for staff positions, volumes in collection, operating expenditures, and income. The questionnaire form is appended. (Author/AB)

FOREWORD

This report, first of a two-part study of the comprehensive 1962 public library survey, presents institutional data for public libraries serving 35,000 persons and above. In content and coverage it continues the 1960 public library survey which was released in three parts in 1961 and 1962 under the title, Statistics of Public Library Systems, Fiscal Year 1960 (OE-15033, OE-15034, and OE-15035). This series of data has been presented annually since 1944 and biennially since 1960.

Part II of this study will provide analytic data for all public libraries regardless of size of population and will bring information from the 1955-56 public library survey up to date.

The University of Illinois, with the approval of the Office of Education, has made plans to publish selected institutional data for libraries serving populations below 35,000.

The 1962 survey was designed to permit trend comparisons with the 1955-56 and 1960 surveys. Information on the amount and sources of income was collected for the first time. The purpose and design of the 1962 survey was extended in order to permit the construction of the first national public library sample.

Sharing survey responsibilities with State library agencies has proved valuable. Because of the cooperation of 48 State agencies, more returns were received more quickly than previously. State agencies were able to retain copies of questionnaires, and agencies requesting them were given print-out copies of institutional data for their States as soon as available.

Sincere appreciation goes to the public librarians who answered the questionnaires and to the State agencies who administered the distribution and collection of forms.

Introduction

The survey questionnaire which served as the basis for this report (as well as for the more comprehensive Part II to follow) was sent to all public libraries in the United States. Names and locations of these public libraries were identified from an inventory of public libraries prepared by State library agencies in 1961 and up-dated at the time of the collection of the data by State agencies in the spring and summer of 1963. Forty-eight State library agencies cooperated in the distribution of over 8,000 questionnaire forms. The State library agencies performed preliminary editing and statistical checking of responses.

Method of Survey

State library agencies identified 864 public libraries which serve areas containing populations of 35,000 or more. Of this number 860 submitted reports. One of the four which did not respond is in the population group of 50,000 to 99,999, and three are in the 35,000 to 49,999 group. The following is a summary of the total number of libraries in the survey and the number and percent of libraries not reporting arranged by population of service area:

Population served	Total number libraries	Libraries not reporting	
		Number	Percent
Total in U.S.	7,257	668	9.2
Over 100,000	263	0	0.0
50,000-99,999	337	1	0.3
35,000-49,999	264	3	1.1
25,000-34,999	269	6	2.2
15,000-24,999	551	26	4.7
10,000-14,999	544	22	4.0
5,000-9,999	701	36	5.1
3,000-5,999	991	67	6.8
Below 3,000	3,337	507	15.2

All population figures used in this report are based on the 1960 Census and all per capita computations are based on the 1960 data. In 1962 these public libraries with service areas of 35,000 and more (860 public libraries reporting) served a combined population of 117,984,000 persons. If the combined population of these reporting libraries were adjusted to the population growth that occurred between 1960 and 1962, the year for which the reported statistics were collected, the adjusted total would be closer to 121 or 122 million persons.

The libraries included were chosen on the basis of population of the service area as reported by the library. Where there were population discrepancies between the reported population and U.S. Census data, revised data were obtained from the official directory of State Library agencies, U.S. Census data, or the

American Library Directory. Following the practice of State library agencies, the Office of Education consolidated all data of members of systems, of branch libraries, and of library headquarter activities into a report of the system as a whole.

Content of Study and Definition of Terms

Data for staff positions, volumes in collection, operating expenditures, and income are arranged in Tables 1-3 by the population strata:

Table 1	100,000 population or more
Table 2	50,000-99,999 population
Table 3	35,000-49,999 population

Table A is a summary table presenting consolidated data for fiscal years 1962 and 1960 for all libraries serving populations over 35,000 (columns 2 and 3) and for populations of 100,000 or more (columns 4 and 5); 50,000 to 99,999 (columns 6 and 7); and 35,000 to 49,999 (columns 8 and 9).

Income statistics are presented for the first time in this series (tables 1-3, columns 21, 22, and 23).

The arrangement of tables 1 through 3 is identical. Each table is concerned with one population stratum only. There are 23 columns in each table, 21 of which are data items described below.

Library Identification

Column 1 lists the city and state in which the administrative headquarters of the library is located.

Column 2 lists the public library name.

Population of Area Served

Column 3 lists the 1960 population of the service area reported by the library. Where two public libraries serve the same city, identical populations are assigned to each agency for the purpose of per capita computation in Table A, but duplicating population figures are excluded from total population of service areas for the United States.

Staff Positions

Column 4 tabulates all positions filled by the responding libraries. It does not include any position unfilled at the time of the survey.

By definition "a professional staff member is a person performing work that requires education, training and skills in the theoretical or scientific aspects of library work as distinct from its merely mechanical and clerical aspects."

Column 5 reports all filled professional positions.

Column 6 reports all professional positions that are vacant.

Staff positions reported in columns 4, 5 and 6 are compiled in full-time equivalent.

Number of Volumes in Collection

Column 7 reports the number of volumes owned by the library at the end of the library's fiscal year (1962).

Column 8 reports the number of volumes added to the library's collection during the library's fiscal year (1962).

Circulation in Volumes

Columns 10 (Adult) and 11 (Juvenile) will not always add to total in column 9 because circulation systems do not permit the identification of loaned material as "Adult" and "Juvenile." This also occurs in the summary Table A.

Operating Expenditures

Column 12 reports the total operating expenditure during the year. It does not include funds expended for the purchase of buildings, sites, or additions.

Column 13 lists all funds spent for salaries and wages fiscal year 1962. Because of their confidential nature total professional salaries have not been reported in this circular as a separate item.

Columns 14-17 report expenditures for library materials. In some libraries it is not possible to distinguish expenditures for periodicals from those for books. For these, the expenditures are combined.

Column 18 reports binding and rebinding of materials.

Column 19 includes all operating expenditures not included in columns 13-18.

Capital Outlay

Column 20 includes only expenditures for buildings, sites, and additions.

Income (This item has not been previously reported)

Column 21 reporting Total Income will not necessarily equal the sum of columns 12 and 20 for any single institution because of the carry-over of funds from year to year.

Column 22 includes all income derived from local governmental appropriations.

Column 23 contains income from State and Federal Government, interest from the library's endowments, and gifts from any source to the library.

1/ Preliminary data.
2/ Data for this item were not available.
3/ Data for this item were not requested.
4/ Per capita expenditures were computed for 1960 and 1962 on the basis of 1960 Census population data. No adjustment was made for population increase or for the increase in operating costs. Because of differential growth in various types and sizes of areas served by individual libraries, no conclusion should be drawn for differences in the rate of increase of operating expenditures between libraries serving different sizes of population.

DEFINITIONS AND INSTRUCTIONS

1. Unless otherwise specified, all annual data are to cover library's reporting year ending during the period January 1, 1962 - December 31, 1962.

2. INVENTORY AND CIRCULATION - Count one for each volume, pamphlet or periodical lent for home use, from central library or any agency, and each renewal. Do not count as circulation books sent to another library agency within the same system where home circulation is counted.

Item B - BOOK COLLECTION. CIRCULATION AND USE - A volume for purposes of this report for inventory and circulation purposes is any physically separate item, including printed, typewritten, mimeographed or processed work, bound or unbound, that has been cataloged or fully prepared for use. Include microcards, microfilms, microprint films, film-strips and recorded discs.

3. STAFF POSITIONS BY FULL-TIME EQUIVALENTS - Item C1 - To compute "full-time equivalents (FTE)," of part-time personnel, add the total number of hours worked per week by all part-time paid personnel (including student assistants and pages), and divide by the number of hours in your full-time work week. DO NOT include volunteer personnel.

EXAMPLE: 4 employees each worked 20 hours per week - 80 hours
2 employees each worked 10 hours per week - 20 hours
6 " worked a total of 100 "

One-hundred hours divided by 40 hours (or the number of hours in your full-time work week) equals 2½ full-time equivalents. Add these 2½ full-time equivalents to the number of full-time personnel to obtain TOTAL personnel in full-time equivalents.

4. PROFESSIONAL BUDGETED POSITIONS - Item C1a - A professional staff member is a person performing work that requires education, training, and skill in the theoretical or scientific aspects of library work as distinct from its merely mechanical and clerical aspects.

When exact information is not available for any item, please make a careful estimate. If data are available for a combination of items but not for each component, make estimates of the individual items. Enter 'NA' for any item that does not apply to your library and a zero '0' when the amount to be reported is zero. DO NOT LEAVE ITEMS BLANK.
